STUDENT EXPECTATIONS

Student Expectations

“Students are leading, for the first time ever, the changes in Education”.

Xavier Prats Monné

Director-General Education and Culture – European Commission – 2014-15

According to a recent Gartner Research Paper

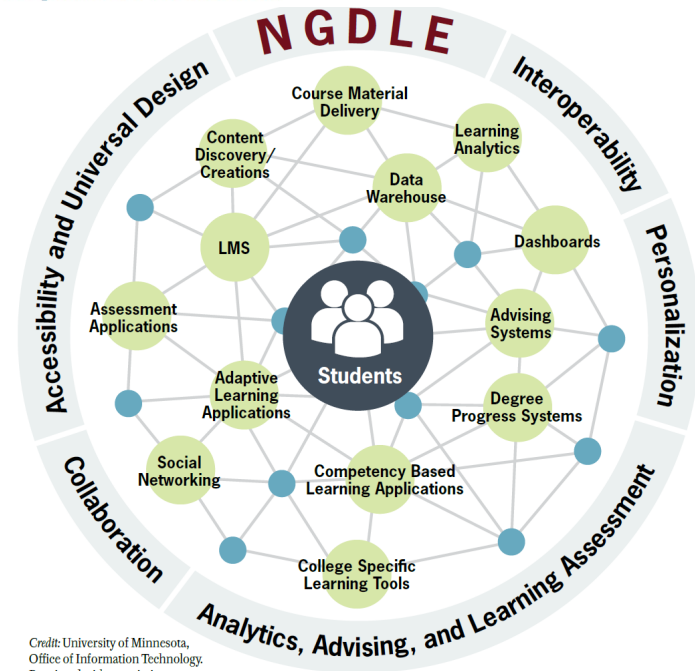

“Globally, there is an emergent but growing focus on the **student experience**, and an emphasis on **personalizing that experience**.”

BUILDING THE IDEAL STUDENT EXPERIENCE

The paths of this roadmap represent the future of an evolving institution grounded in the fundamental values of what students want and need.

All students should encounter proactive, coordinated and nurturing interactions and services in every part of the institution, beginning with their very first interactions and extending through their entire Mason journey.

All students should experience a harmony of people, processes, and technologies in a transparent, responsive environment.

All students should feel part of an inclusive community of learners, educators and innovators who share in unified, holistic practices and experiences regardless of time, location or mode of learning.

REDESIGN INITIATION EXPERIENCE

STUDENT VOICE
Students should be active contributors to the evolving vision and expression of the collective Mason experience.

BUILD A FOUNDATION

These five ideals not only drive prioritization for new programs, technology, & services but are also the foundation on which the roadmap is built.

ACCESS

A network of programs, staff, & facilities that removes friction & improves transparency.

INCLUSION

A shared language & approach for celebrating different perspectives & infusing them into the process of learning.

FLEXIBILITY

A system that seamlessly updates and adapts to unique student needs.

TEAMWORK

A partnership between Mason faculty & staff, working in tandem for common goals & collaborating to overcome obstacles.

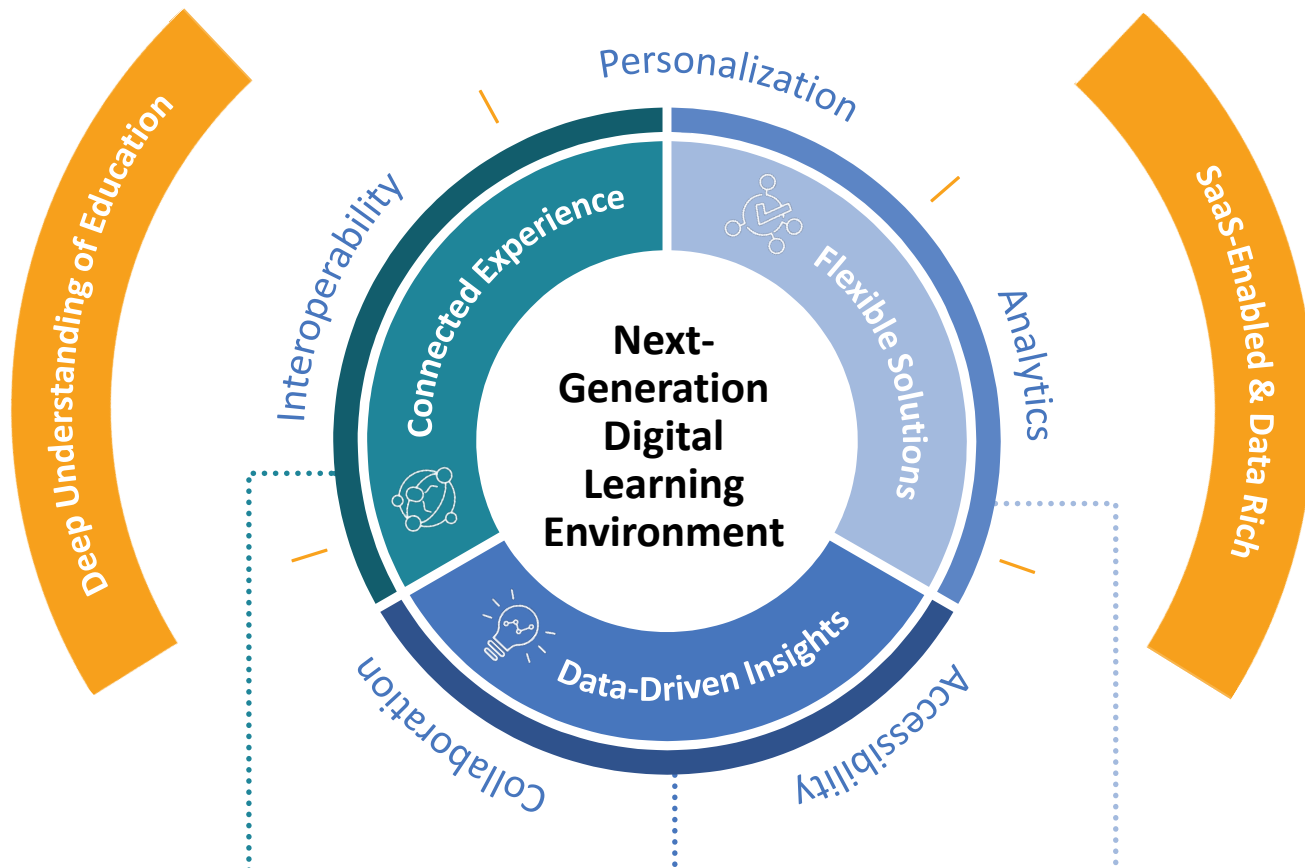

TRUST

A feedback mechanism for interactions & decisions that delivers on expectations & earns credibility.

Blackboard Approach: An Integrated Environment

Provide comprehensive student-success solutions through connected, flexible experiences.

Deliver data-driven insights that lead to action, increased quality & innovation.

Engage with a community of educators and ecosystem of partners for exponential value.

A photograph of a subway platform. A bright yellow tactile paving strip runs down the center of the platform, providing a guide for visually impaired passengers. The platform has a tiled floor and a metal railing on the left side. In the background, two people are walking away from the camera. The text "UNIVERSAL DESIGN" is overlaid in the center of the image.

UNIVERSAL DESIGN

Accessibility and Universal Design for Learning

Accessibility refers to the design of products, devices, services, or environments for people who experience disabilities. The concept of accessible design and practice of accessible development ensures both "direct access" (i.e. unassisted) and "indirect access" meaning compatibility with a person's assistive technology.

Universal Design refers to broad-spectrum ideas meant to produce buildings, products and environments that are usable to the greatest extent possible by everyone, regardless of their age, ability, or status in life.

Equality

Equity

Accessibility

Universal Design

The European Legal Framework

UN Convention of the Rights with People with Disabilities

Article 9: obliges to take appropriate measures to ensure access for persons with disabilities, on equal basis with others, to inter alia information and communication technologies, including the internet.

- **European Disability Strategy 2010-2020**
- **EC European Accessibility Act 2015/0278**
proposal to make products and services more accessible.
- **Directive (EU) 2016/2122**
Better access to the websites and mobile applications of public services.

EU Country Legislation based on the EU Directive, at least. Penalties may apply.

Calendar

- Sep 2018. Mandatory for All Websites, excluding Intranets and Extranets
- Sep 2019. Mandatory for all Websites, including New or Updated Intranets and Extranets
- Sep 2020. Mandatory for All Websites without exceptions

EN 301 549 V2.1.2 (2018-08)

EN 301 549 V2.1.2 (2018-08)

Accessibility requirements for ICT products and services.

Equivalent to **W3C WCAG 2.1 Recommendation**

Where are we in Europe? What about the content?

According to the HE Institution

Is there an available program of curricular adaptations to students with disabilities?

According to the Students

Areas in which students with disabilities have perceived accessibility barriers?

	Face 2 face
In the Classroom	52,3%
Materials offered by the professor	36,3%
Common Spaces	36,0%
Transportation	27,4%
Auditorium	25,2%

Blackboard's Proposal: Ally (For LMS and Websites)

Analysis and creation of more Accessible Content through Machine Learning

Table 1: Captured Data Statistics

Metric	Total	Min	Max	Mean
Page Visits	530,334	51	53,459	10,607
Unique Page Visits	218,228	36	26,756	4,365
Google Searches	39,838	0	4,203	797
Bing Searches	186	0	53	4
Yahoo Searches	87	0	29	2
Wikipedia Pages	1,728	0	235	35

Extracted Terms

We implemented the Term Extraction algorithm as presented in [31], running it on the full text of each visited web page. It attempts to summarize the web page's text into a set of important keywords. This algorithm uses the C/N/C method, which uses a combination of linguistic and statistical information to score each term. Term candidates are found using a number of linguistic patterns and are assigned a weight based on the frequency of the term and its context. This is implemented with some heuristics on
