BM2022 – Staff FTE vs. Voice services and connections

BM2022 Additional energy questions

BencHEIT additional energy-questions in BM2022

BM2022 contained an additional sets of questions regarding the energy crisis. IT was voluntary for the participants to fill in. 37 participants answered the energy questions in addition to the actual survey.

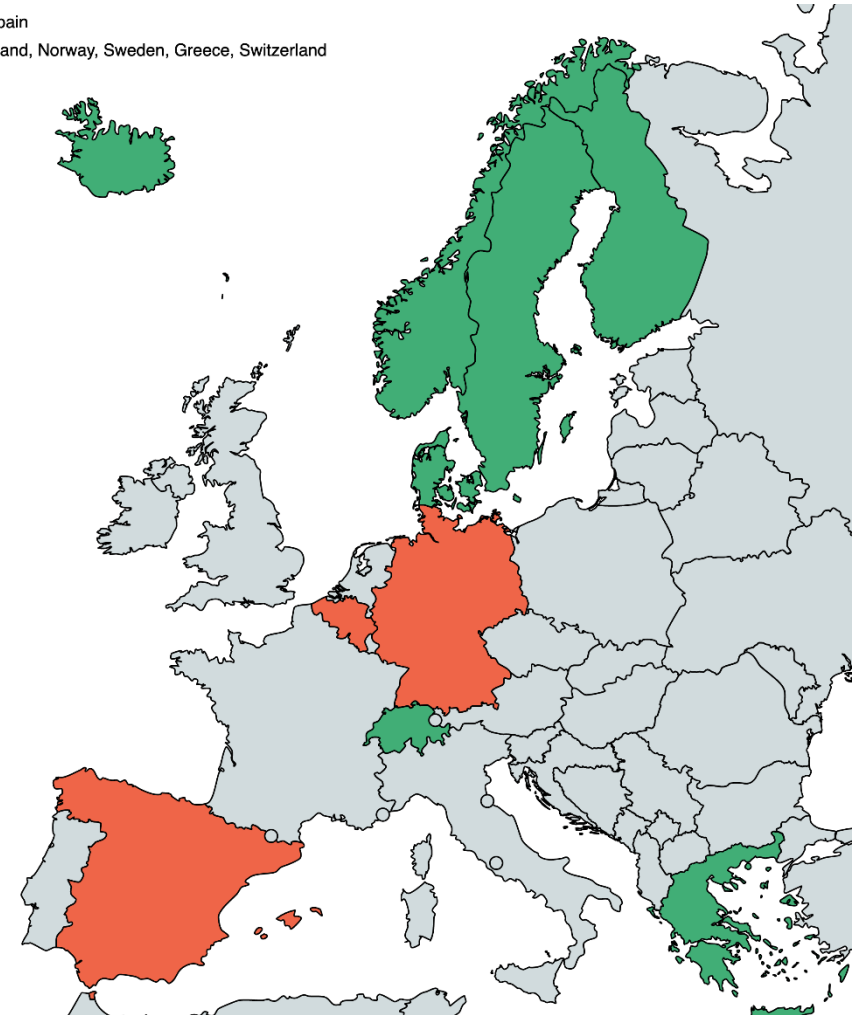

There will be a separate report on energy issues in addition to the normal BM analysis.

Here are some findings.

Has electricity costs affected your university's IT budget?

■ Yes; Belgium, Germany, Spain
■ No; Denmark, Finland, Iceland, Norway, Sweden, Greece, Switzerland

Comments:

- The real impact may be noticed over the next years, even if it hasn't yet impacted the budget as much
- Increased energy budget may have reduced budgets for others, including IT

What kind of actions have been taken to lower the consumption of electricity?

Has your organisation taken actions to lower energy consumption?

- Decreasing of heating in the winter months
- Decreasing of cooling in server rooms
- Changing to LED lightning
- Turning off lights, computers, ventilation, outdoor lightning on weekends and nights
- Including the staff in coming up with ideas for saving, as well as informing them about how they can help save electricity best
- Several organisations have already had plans for saving electricity before the crisis

Does your university have a 'green program' e.g. using sustainable energy source only?

- 58% already using green energy
- 11% had it in their plans for the near future
- Several reported that they have a plan to be carbon neutral by 2030
