

Pre-conference workshop 3, Tuesday 4 June 2024, 10.00 - 13.00 CET

“Information Security Management - Six hundred thousand personal identification numbers astray – managing a serious personal data breach”

Programme

Time in CET	Session / Content	Speaker(s)
10.00 - 10.10	Welcome & opening, programme	Thorsten Küfer, FH Münster Asbjørn Thorsen, Sikt
10.10 - 10.20	Brief introductions of all attendees	<i>audience</i>
10.20 - 12.50	Hands-On workshop “Managing a data breach” 10:20-11:30 Working in group 11:30-11:40 Break 11:40-12:40 Working in group 12:40-12:50 Conclusion - what have we learned’ A breach in personal data security has resulted in six hundred thousand personal identification numbers going astray. In this workshop, we will explore the extent of this security breach, its potential consequences, and most importantly - how such situations should be managed to minimize damage and prevent future breaches. We play out the breach as an incident response team, and delve into procedures, solutions, media handling, and the laws governing the handling of such serious incidents. The workshop is based on a real event but seeks to let participants themselves take part in handling a serious personal data breach and discuss their way to a response plan for such a type of breach in personal data security.	Øyvind Straume, Sikt
12.50 -13.00	Evaluation Future plans of SIGs Closing remarks	Thorsten Küfer, FH Münster Asbjørn Thorsen, Sikt
