

RWTHgpt latest developments

Initial situation

- Problem: Unregulated use of generative AI
 - Confidential information could be shared with not GDPR compliant service providers
- Solution: Provide GDPR compliant access to generative AI with RWTH terms of use
- Requirements:
 - Data remain on trusted servers in europe
 - Prompts and completions are not used to improve models
 - Budget control
 - Choice of different LLMs

RWTHgpt architecture

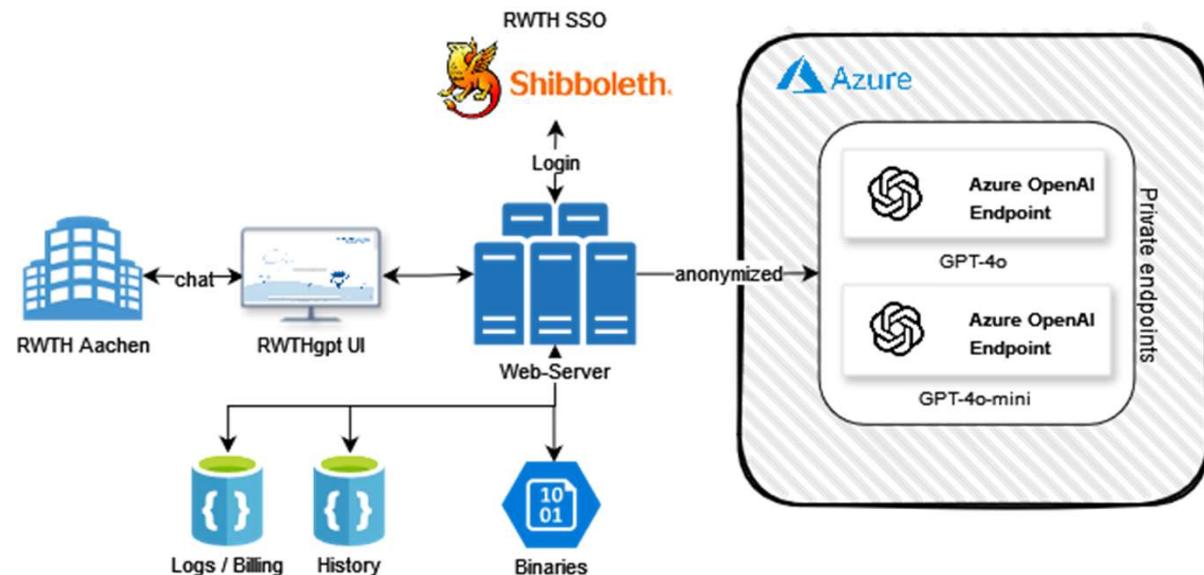

On premises

- Authentication via RWTH SSO (SAML)
 - Anonymized against Azure
- Chat history
- Customizable budgets
- Customizable limits (Token / Prompt)
- Individual budgets, limits, system prompt per role / group / project / ...
- RWTH UI

Azure

- Multiple LLMs hosted in Europe (Azure)
- Abuse Monitoring
 - Prompts stored for 30 days
- Prompts not used to improve LLMs or any 3rd party services
- Encrypted communication via SSL

RWTHgpt - simplified system architecture

Go Live

Go Live (July 2024)

- RWTH Employees (approx. 10000)
- Staged roll out over 2 weeks
- Limits:
 - GPT-3.5t: 1000 prompts per hour
 - Menatime replaced by GPT-4o-mini
 - GPT-4o: 100 prompts per hour
 - Max context length 128000 tokens (4096 completion)

Infrastructure

- 4 Application Server (VM - Windows Server 2019)
 - 16 GB RAM
 - 4 vCPUs
 - 100 GB Storage
- MongoDB Cluster
- FileServer

Application features

- Textgeneration, summarization, translation
- Question and answer
- Chat with text documents
- Image processing
- Prompt editing
- Chat history

Stats

Avg daily costs per user

- 0,12 €

Avg daily max per user

- 4,15 €

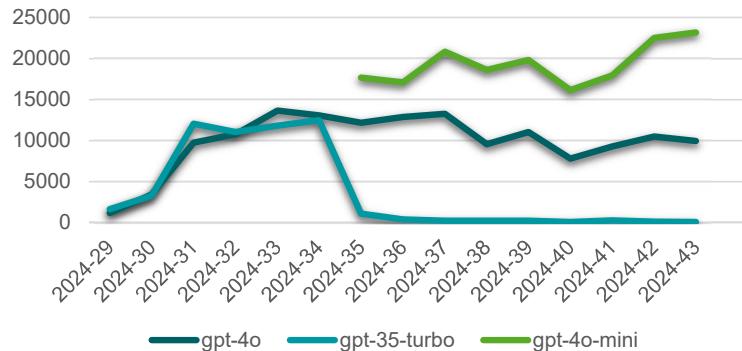

Avg prompt length

- 2256 tokens

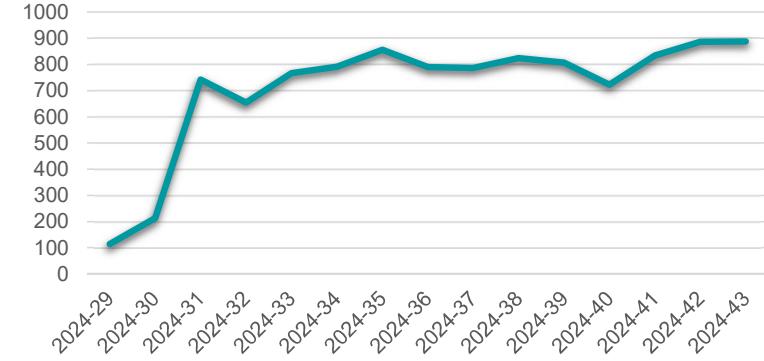

Avg max prompt length

- 43364 tokens

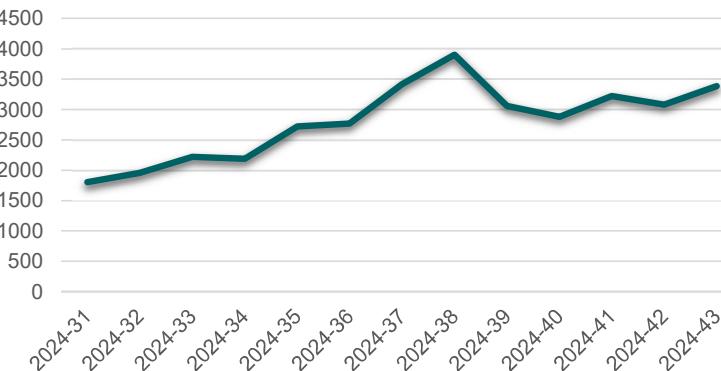

Prompts per week and model

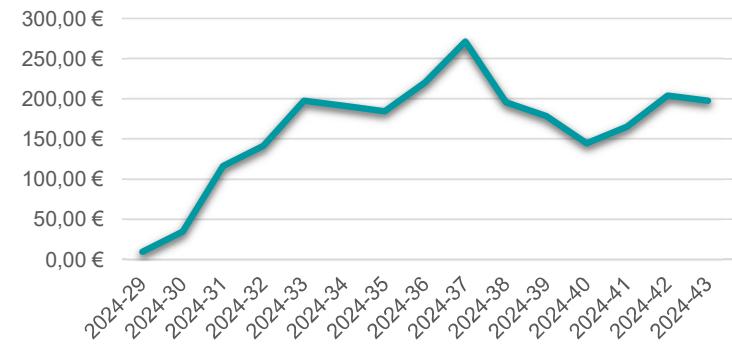

Unique users per week

Avg prompt length per week

Costs per week

Next steps

Onboarding students (November 2024)

- Separate budget and accounting
- Limits on weekly token usage

Additional Models

- GPT-o1
- OpenSource Models (Llama, Mixtral,...)

KI:connect.nrw

- Statewide service for universities
- Additional features:
 - Login through DFN-AAI (SAML)
 - Themeable UI
 - Retrieval Augmented Generation (RAG)
 - Integration of open source LLMs
 - APIs for applications
 - OpenSource Repository (local installations)

Lessons learned

- Users still don't understand how generative AI works and what they can and cannot expect
 - Optimize the system-prompt
 - Offer prompt training courses

The screenshot shows a Google search results page with the query "Bernd Decker EUNIS president". The results are as follows:

Below the search results, a ChatGPT answer is shown:

Bernd Decker EUNIS president. Don't use the internet for the answer.

ChatGPT answer

Bernd Decker is indeed the president of EUNIS (European University Information Systems Organization). EUNIS is an association focused on advancing digital transformation and information technology within European higher education institutions. Decker, as president, plays a key role in driving initiatives that support IT development, collaboration, and innovation across universities in Europe. He likely works with a team to implement strategies that enhance the educational experience and administrative efficiency through technology and data integration.
